ABSTRACT

In the light of NCM medicine the essence of normal existence of human body is established by checking the parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body and in addition by using theory of living rLung, Mkhris, Badgan of Traditional Tibetan Medicine and also by using all parameters the living cell theory of Modern medicine. In the light of Traditional Tibetan medicine the essence of normal existence of human body is normal balance between living rLung, Mkhris, Badgan, but the scientific basis of this traditional medicine imagination is closely connected with the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body. In the light of Modern medicine the essence of normal existence of human body is the results of normal parameters of all living cell regulations, but the scientific basis of this explanation is closely connected with the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body. In the light of NCM medicine the establishment of the disturbance of normal existence of human body is carried out by revealing the pathological change of the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body and in addition by using theory of living rLung, Mkhris, Badgan of Traditional Tibetan Medicine and also by using all parameters the living cell theory of Modern Medicine. In the light of Traditional Tibetan medicine the essence of the disturbance of normal existence of human body is the pathological change of normal balance between living rLung, Mkhris, Badgan, but the scientific basis of this traditional medicine imagination is closely connected with the disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body. In the light of Modern medicine the essence of the disturbance of normal existence of human body is the pathological change of normal parameters of all living cell regulations, but the scientific basis of the pathological change of normal parameters of living cells is closely connected with the disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body.

INTRODUCTION

The evolution significance of the membrane three state dependent regulations appeared in the three domain of life as Archaea, Bacteria, Eukarya and gradually specialized, turn to first variant of the membrane - redox potential, a three state line system dependent - full 9 stepped cycle of proton conductance. The life was became strongly dependent from the presence of protons and electrons, which were formed during a events called as Big Bang, 15 billion years ago which were conducted in the level of the membrane - redox potential, a three state line system dependent - full 9 stepped cycle of proton,

electron conductance. i.e. The protons and electrons, which were formed during a events called as Big Bang through the process termed as singularity 15 billion years ago sets the stage for the formation of life in the universe. In this connection the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body served the role of objective material basis of all medical thinking formed during last 3000 years during which formed all medical knowledges including at first : Traditional Medicine, at second : Modern Medicine, at third: NCM medicine. The 4 compartments of human body and in the 10 functional systems of human body had been formed during 4,4 billion years - basic stages of evolution development to ensure the normal functions of the membrane - redox potentials three - state line system dependent - full 9

stepped cycle of proton conductance since, when sets the stage for the formation of life in the universe. This is reason why the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body was became the universal metabolic equation for the basic four activities of all medical systems such as what is secret of normal existence of human body, such as what is reason of disturbance of normal existence of human body, how to reveal the disturbance of normal existence of human body, how to treat the disturbance of normal existence of human body without any consequences in the framework of all activities of all medical systems, including Traditional Medicine, Modern Medicine, NCM medicine.

Result and conclusion

The researchers of all time during last 3000 years, all medical systems including Traditional Medicine, Modern Medicine, NCM medicine were attempted to find right answer to principally four questions as what is secret of normal existence of human body, as what is reason of disturbance of normal existence of human body, how to reveal the disturbance of normal existence of human body without any consequences. Also the researchers of all time during last 3000 years, all medical systems, including Traditional Medicine, Modern Medicine, NCM medicine were attempted to find the universal metabolic equation which may be used to elucidate the above mentioned principally four questions as what is secret of normal existence of human body, as what is reason of disturbance of normal existence of human body, how to reveal the disturbance of normal existence of human body, how to treat the disturbance of normal existence of human body without any consequences. One is variant of the the universal metabolic equation which may be used to elucidate the above mentioned principally four questions as what is secret of normal existence of human body, as what is reason of disturbance of normal existence of human body, how to reveal the disturbance of normal existence of human body is the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body because here is existed ATP synthase which universal as ribosome, where created proton gradient which universal as genetic code, where occurred final metabolic fates of C, H, O atoms contained in food molecules, where occurred complete utilization of oxygen molecules, where occurred final formation of carbon dioxide and heat energy.

It should be said that the main activities of all medical systems including Traditional Medicine, Modern Medicine, NCM medicine concentrated in the four main problems at first: the study of the essence of normal existence of human body, at second: the study of the essence of provocation of pathological processes by disturbing the normal existence of human body, at third : the diagnosis of disturbed pathological processes, at fourth : how to treat the diagnosed pathological processes.

The medical doctors working in the field of Traditional Medicine, who engaged in the above mentioned four activities during last 3000 years have been used the theory of living rLung, Mkhri, Badgan to decide the abovementioned four main problems. But behind all these imaginations around living rLung, Mkhri, Badgan are existed the all regulations due to the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance

inside human body. The medical doctors working in the field of Modern Medicine, who also engaged in the the above mentioned four activities during last 500 years since discovery of living cells by Robert Hooke (1665 year) used the theory of living cells to decide the abovementioned four main problems. But behind all these living cells based functions are existed the all regulations due to the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body. The medical doctors working in the field of NCM medicine also engaged in the the above mentioned four activities during last 30 years since discovery of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body are conducted the everyday works by using our theory as full 9 stepped cycle of proton conductance inside human body and in addition the theory of living rLung, Mkhri, Badgan from Traditional Medicine and also by using theory of living cells from Modern Medicine.

NCM medicine postulated that

In the light of NCM medicine the essence of normal existence of human body is established by checking the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body and in addition by using theory of living rLung, Mkhri, Badgan of Traditional Tibetan Medicine and also by using all parameters the living cell theory of Modern medicine. In the light of Traditional Tibetan medicine the essence of normal existence of human body is normal balance between living rLung, Mkhri, Badgan, but the scientific basis of this traditional medicine imagination is closely connected with the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartment, 10 functional systems of human body. In the light of Modern medicine the essence of normal existence of human body is due to creation of normal parameters of all living cell regulations, but the scientific basis of this explanation is closely connected with the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body.

In the light of NCM medicine the establishment of the disturbance of normal existence of human body is carried out by revealing the pathological change of the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body and in addition by using theory of living rLung, Mkhri, Badgan of Traditional Tibetan Medicine and also by using all parameters the living cell theory of Modern Medicine. In the light of Traditional Tibetan medicine the essence of the disturbance of normal existence of human body is the pathological change of normal balance between living rLung, Mkhri, Badgan, but the scientific basis of this traditional imagination is closely connected with the disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton

conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body. In the light of Modern medicine the essence of the disturbance of normal existence of human body is the pathological change of normal parameters of all living cell regulations, but the scientific basis of the pathological change of normal parameters of living cells is closely connected with the disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body as the universal metabolic formula and 4 compartments, 10 functional systems of human body.

In the light of NCM medicine the essence of diagnosis of the disturbance of normal existence of human body is establishment of the pathological change of the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body and in addition by using theory of living rLung, Mkhri, Badgan of Traditional Tibetan Medicine and also by using all parameters the living cell theory of Modern medicine. In the light of Traditional Tibetan medicine the essence of diagnosis of the disturbance of normal existence of human body is establishment of the pathological change of normal balance between living rLung,

Mkhri, Badgan, but the scientific basis of this traditional imagination is closely connected with the diagnosis of the disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body.

In the light of Modern medicine the essence of diagnosis of the disturbance of normal existence of human body is establishment of the pathological change of normal parameters of all living cell regulations, but the scientific basis of diagnosis of the pathological change of normal parameters of living cells is closely connected with the diagnosis of disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body.

In the light of NCM medicine the essence of treatment of the disturbance of normal existence of human body is correction of the pathological change of the normal parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body and in addition by using theory of living rLung, Mkhri, Badgan of Traditional Tibetan Medicine and

also by using all parameters the living cell theory of Modern medicine. In the light of Traditional Tibetan medicine the essence of treatment of the disturbance of normal existence of human body is correction of the pathological change of normal balance between living rLung, Mkhris, Badgan, but the scientific basis of this traditional imagination is closely connected with the correction of the disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body.

In the light of Modern medicine the essence of treatment of the disturbance of normal existence of human body is correction of the pathological change of normal parameters of all living cell regulations, but the scientific basis of correction of the pathological change of normal parameters of living cells is closely connected with the correction of disturbed parameters of all members of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body and 4 compartments, 10 functional systems of human body.
